**Description of Work To Be Performed**

The following is the current schedule of activities and anticipated completion dates. Any circumstances that may alter the dates further should be discussed with the OSC.

- Meet with the OSC on-site on September 6, 2013.
- Develop a plan with the OSC and START contractor (RST) on the movement and staging of containers.
- Identify containers that will be sampled.
- Establish a staging area for containers to be brought for sampling.
- Provide for structural engineer for the steel structure.
- Provide adequate supplied air for all workers.
- Assist in the opening of containers and collection of contents.
- Perform hazardous characteristics (HazCat) of material collected in the field.
- Install temporary caution fence along the eastern boundary of the property, along Jacob Harris Lane. Potential needed for a security guard.
- Stabilize containers that are leaking and prepare for container integrity to fluctuate as they are moved.
- Provide appropriate fire suppression mechanisms for working with unknown contents.
- Generate a Site Specific Health and Safety Plan for actions that Kemron personnel will be delegated to perform.
- Provide documentation indicating the outcome of HazCat of materials.

Continue to provide OSC with 1900-55's, offsite hour reports, and daily activity reports. **Draft 1900-55s shall be delayed no more than 2 weeks of services.**

Follow Region 2 Green policies to include recycling of paper waste. Follow recommendations outlined in Region 2 *Clean and Green* Policy. This includes authorization for additional electrical charges which are supplemented by alternative energy sources.

Ensure the Health and Safety of all Kemron personnel on-site.

**I certify that the above work is ordered and authorized in the performance of the above cited Task Order.**

**I acknowledge receipt of this work order.**
